Subject: Re: Review/Input on Draft List of OR CZARA Issues to be T'ed Up for Management

Hi Jayne--

I think you've covered all of the main issues that I'm aware of. Although I would also add that we need their input on how do we want to handle our pesticides decision with the ESA/label negotiations still ongoing between other parts of our agencies.

For the funding issue, based on Joelle's update to me of her last mngt call with Lynda and Christine, I think that is now resolved. Both Lynda and Christine agreed EPA would impose save 30% (w/out compounding) penalty as

NOAA. However, it would be good for EPA folks to confirm that before the call so we don't have to spend time on that during the call.

Hi All,

Am compiling a list of Issues we are T-ing up for management. Please review for accuracy and add the missing information or additional issues.

OR CZARA Issue List

1. Whether new management measures can (attorneys say yes) or should be added for ag.
2. Whether ag MMs continues to meet threshold for approvability given new information on the assumptions underlying our previous interim decision
3. Penalty amount for EPA (baseline? Compounding?)
4. Whether EPA/NOAA would approve additional forestry MMs for riparian if riparian rule includes management measures that adequately protect riparian areas of medium and small fish bearing streams but fails to address non-fish bearing streams.
5. Threshold for back-up enforcement authority for OSDS
6. Concerns about Oregon's monitoring program, even though EPA/NOAA did not public notice those MMs.
7. Whether EPA/NOAA can approve additional MMs for Forestry for roads, given the following deficiencies: legacy roads not addressed....
8. Whether EPA/NOAA can approve additional MMs for forestry/pesticides....

Thanks!
